SUMMARY

Proficient in C++, Python, C, and Data Structures, with experience in Data Analysis, Tableau, SQL, and Django. Currently learning Machine Learning algorithms to develop intelligent, data-driven solutions. Skilled in building efficient and scalable applications with a focus on problem-solving.

SKILLS

- C++/Python/C
 - Data Structures
 - Data Analysis
 - Tableau
 - SQL
 - ML algo
-

PROJECTS

Movies Recommender System

- Designed and developed a movie recommendation system using Python and libraries such as Pandas and NumPy for efficient data handling.
 - Implemented a vector similarity approach to calculate movie recommendations based on user preferences.
 - Utilized Pickle for file management to optimize loading and saving of preprocessed data.
 - Built an interactive user interface with Streamlit to deliver seamless user experiences.
 - Deployed the application on Heroku for public access and scalability.
-

EDUCATION

Bachelor of Technology at oriental College of technology

oct 2021 - july 2025

ADDITIONAL INFORMATION

- **Soft skills** : Excellent Communications , Social adaptability , Rational Thinking , team management , Descision making
 - **Interest and Hobbies** : Reading , Share market analysis , Fitness , Sports
-
